

Caregiver Action Map

Caregivers to persons with disabilities perform many vital and crucial roles. The responsibilities and challenges they face in caregiving can often be overwhelming. Caregivers who are aging or have complex needs are more vulnerable to these challenges.

It is this exigency – caring for the caregivers – that gave rise to the Coalition of Partners for Caregiver Support.

SG Enable, supported by the Institute of Policy Studies, worked with the Coalition of Partners represented by 25 community partners, social service agencies and hospitals to conceptualise a holistic Caregiver Action Map for enhanced caregiver support.

This Caregiver Action Map highlights how we can collectively come alongside caregivers to empower, improve and transform the caregiving journey for those with loved ones with disabilities.
